-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 10-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Guerra (5,910,940).

Guerra discloses the invention as claimed. The reference show the optically readable record carrier having at least one information layer (see for example layer 123), wherein information is encoded in an information structure comprising track-wise arranged information areas which alternate in the track direction with intermediate areas, characterized in that the information layer comprises means for directing radiation of a read beam (see section 113), which is perpendicularly incident on the information layer, in a direction at an acute angle to the chief ray of the incident beam (see for example Fig. 14), as set forth in the claims.

The reference further teaches: the first and second inclinations which can be in the form such as a triangular profile, which also include a sawtooth profile, (see for example the triangular portions as shown in section 113, and column 14), as set forth in

claims 2-5 and 11-15; and the diffraction grating (see Figs. 25 and Figs. 34A-35B, and column 25), as set forth in claim 14. See also the description of the apparatus and figures for further details relating to the limitations as set forth in the claims.

Allowable Subject Matter

Claims 6-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record alone or in combination does not teach or suggest the optically readable record carrier of claim 1, having the further limitations as set forth in claims 6-9.
